Information Sources: Bloomberg, The Association of Investment Trust Companies (AITC) and published company information.

^{* &}quot;Asset Gearing" = the ratio of the gross assets to the net assets (x100). It assumes full dilution of warrants. A value of 100 implies that the trust has no gearing.

* The volatility measure is the Volatility Rating from Thomson Financial Datastream. There rating is on a scale from 1 to 20, which corresponds to a standard deviation of 0% to 50%. Trusts with a volatility over 20 are shown as 20+.

* The performance" refers to total returns assuming dividends are re-invested. For both the NAV and TR performance, the 3 year and 5 year figures are expressed in this table as compound annual rates.

Information and Disclaimer: This document is published solely for informational purposes. It does not take into account your investment needs or personal circumstances and so is not intended to be viewed as investment or financial advice. Should you require financial advice you should always speak to an Authorised Financial Adviser. The price, value and income derived from investments may fluctuate because values can go down as well as up and investors may get back less than originally invested. Past performance is not indicative of future results and no representation or warranty, express or implied, is made regarding future performance. The levels and bases of taxation may change. Where an investment is denominated in a foreign currency, changes in rates of exchange may have adverse effect on the value, price or income of the investment.
